

Complete picking and sortation system

# Hagemeyer

# Pick&Pack, Sort&Send

Univeyos new cross-belt sorter is the affordable, yet very efficient and reliable heart of the solution

## Hagemeyer in brief

Hagemeyer is an international distributor of electrical and electronic consumables and supplies to companies such as Newey & Eyre who are part of the Hagemeyer Group.

## Picking & Packing

Order picking is initiated from the WMS, which interfaces the Univeyor WCS and keeps track of all orders.

After completion of zone picking, totes are transferred to the 20 packing stations. Here all orders are scanned and packed to carton.

Dispatch labels are attached, the cartons sealed and placed on the sortation conveyor.

## Sortation & Dispatch

Cartons are transferred to the cross-belt sorter, which is able to sort over 6000 parcels an hour. The sorter is powered with far fewer moving parts than traditional cross-belt sorters making it much more reliable and affordable.

Items, from jiffy bags to large cartons, are sorted smoothly into the chutes.

All orders are collated and dispatched.

Malcolm McGowan, Warehouse Manager of Hagemeyer:

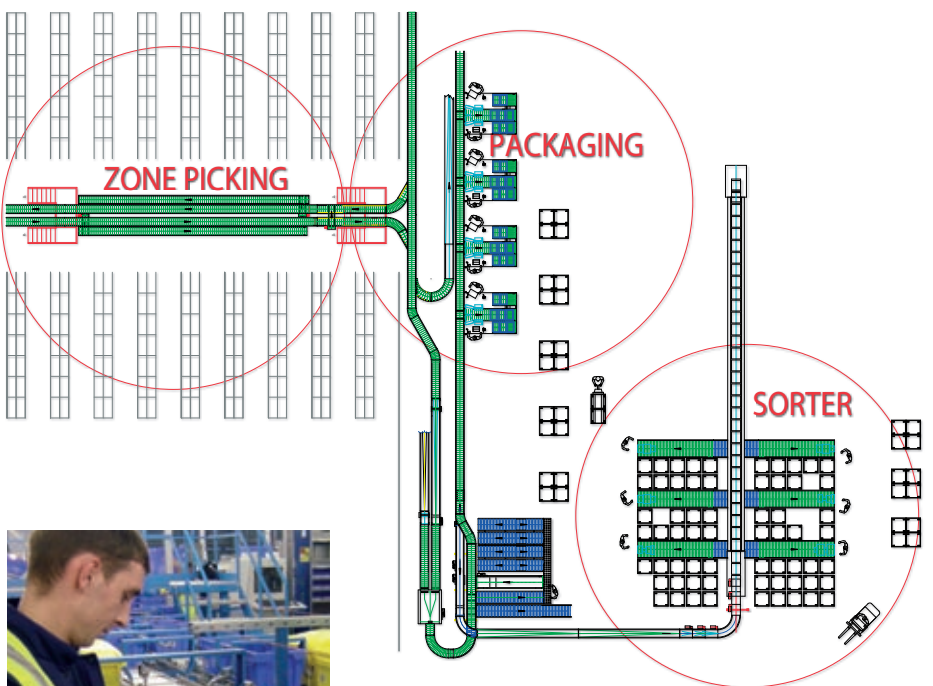

*"The new system is vital to the business of Hagemeyer. Univeyor has worked with us throughout the development and we are proud of the system we now have."*

### Key warehouse data

- 20000 orders/day
- 50000 SKU's
- Next day delivery from 18.00hrs cut-off

# State of the art

Hagemeyers new National Distribution Centre secures day-to-day delivery throughout UK and Ireland

Totes visit each  
picking zone according  
to the workflow

## Delivery

- Conveying system for multi-floor zone picking
- 20 on-screen packing stations
- Cross-belt sorter
- WCS (Warehouse Control System)

## Benefits

- D.C. can handle business growth of 10% p.a.
- More efficient picking and delivery lead times
- 1250 orders per hour
- 2500 parcels per hour
- Excellent ergonomics
- Flexible and extendable

David Power,  
Logistics Director of Hagemeyer:

*“This is a really elegant solution. We were able to get all the benefits of a state of the art picking and sortation system at an affordable cost.”*
